PROJECTS

Mock Interview Preparation Platform | Next.js, React, Firebase, AI

Mar 2025

- Engineered a full-stack web application to simulate technical interviews, enabling users to practice SSH-based coding challenges in a realistic environment.
- Integrated Google AI (Gemini 2.0) for dynamic question generation, Firebase for secure authentication and data storage, and Next.js for server-side rendering and API routes.
- Implemented TypeScript, Tailwind CSS, and Radix UI for a robust, accessible, and visually appealing user interface.
- Leveraged React Hook Form and Zod for seamless form validation and data integrity, ensuring a smooth user experience.

AI Fusion 2K24 - Event Registration Platform | Tailwind, React, Firebase, Razorpay

Oct 2024

- Built scalable registration system handling 500+ registrations with **payment gateway** integration.
- Implemented responsive UI with Framer Motion animations, achieving optimal performance through efficient state management and Firebase query optimization.

Subscription Tracker | Express.js, MongoDB

Jan 2025

- Developed a web application to **manage and monitor subscription** services (e.g., Netflix), ensuring users never miss a renewal.
- Integrated secure user authentication mechanisms and implemented an automated email reminder system for upcoming subscriptions.**highlight key points**
- Optimized backend operations using Express.js and MongoDB for reliable performance and scalability.
